The program allows you to set password for your zip archive and prevent other people from modifying the files. Unzip Password for Windows offers a very intuitive interface

What's New In Directory Editor?

File Editor enables you to edit the properties of selected file or a group of files by enabling you to change the properties of the selected files, such as renaming, moving or copying the files, and so on. Description: Classic FTP is a powerful FTP Client for Windows, which was originally released in 1996. The application is a successor of its freeware predecessor, dubbed FTP Client in the CNET. The major difference is that Classic FTP has more options for various FTP scenarios. It includes many FTP commands to provide a wide range of capabilities. It also supports saving the entire directory structure to disk or to a network share, has an easily customizable interface, and enables you to use it in a custom manner. Description: Get new downloads, ask friends for help, read what's new in the world, find a place to buy a gift, and much more -- all from the "App Store." You can also see which apps, books, movies and TV shows are popular among your friends, or explore new apps in categories such as Travel, Finance, Sports and Entertainment. Description: Folder Organizer - View the contents of your folders and folders that contain files. Folder Organizer is designed to help you in efficiently organizing your files, and to quickly find the files you want to see. It saves you from spending a lot of time looking for files. When you open the program, all the contents of your folders will be visible to you at once. Description: Litestep is a screen recorder and screen capture application for Windows. With this software, you can easily record your computer screen as a Windows screen shot, record your computer screen as a video, and capture your desktop as a bitmap image. Also, Litestep is a

screen capture utility to capture and download web pages as a Windows screen shot. Description: Live FTP is an easy-to-use FTP client for Windows. With its intuitive user interface and a multitude of options, you'll be able to manage your files, share them with friends and use FTP with little effort. Description: The Livescribe app is designed to help you keep your handwritten notes. Once you've started writing, it automatically saves each note as you make it, and automatically transcribes them in a searchable format. It also allows you to link your notes to a web page so that you can view and edit them online. Live Note allows you to copy, edit, and share your handwritten notes. Just tap to start a new note and it automatically saves it. If you want, you can take a picture of a handwritten note and it will be automatically recognized and transcribed. When you're done writing, you can export your note as a PDF file. If you've copied a note or image to another app, Live Note will include a link to that note. Now, you can open the note by tapping the link.
